ClaudeFast Growth Kit

Stop Building Products Nobody Knows About.

The complete marketing system for technical founders: 34 skill files covering research, copywriting, content, and launch strategy - all consolidated from top marketing practitioners and built directly into Claude. Stop guessing what to write. Start seeing what converts.

Built for developers and founders who ship great products but struggle with marketing

*Part of the ClaudeFast Bundle. Need to build the product first? The bundle also includes the **ClaudeFast Code Kit** for development agents, skills, and workflows.*

Does This Sound Familiar?

- **You built something great. Nobody cares.** Your product works. Your code is clean. But your landing page sounds like everyone else's, and your "content strategy" is posting randomly and hoping something sticks.
- **Marketing feels like guessing in the dark.** Should you write a blog post? Launch on Product Hunt? Try Reddit? Send cold emails? You've tried pieces of everything but never had a system that actually works.
- **Copywriting makes you want to quit.** You stare at a blank landing page for hours. Every headline sounds generic. You know your product is valuable but you can't seem to communicate it without sounding like a used car salesman.
- **You've read the books, watched the courses, taken the notes.** Marketing Twitter. SEO blogs. Copywriting frameworks. You've consumed hundreds of hours of content. But when it's time to actually write, you still freeze.
- **Competitors with worse products are winning.** They're everywhere on social. They're ranking on Google. They're closing deals. And you're still trying to figure out what a "value proposition" actually means.

The painful truth? You can build anything, but you can't explain why anyone should care. And until you solve that, your product stays invisible.

Every day you delay marketing, your competitors get further ahead. Not because they're better builders. Because they're better communicators.

Here's What's Actually Happening

You're not bad at marketing. **You just don't have the right frameworks in the moment.**

The gap isn't knowledge - you've consumed plenty. The gap is having the right frameworks, templates, and mental models accessible exactly when you need them. When you're staring at a blank landing page. When you're trying to write a launch email. When you're deciding what content to create.

The Growth Kit solves this by building marketing expertise directly into Claude. Not as a course you have to learn. Not as templates you have to remember. As skills that activate automatically when you need them.

You say "write me a landing page." Claude already knows:

- PAS framework for pain agitation
- AIDA structure for conversion flow
- Headline formulas that actually work
- Awareness level matching for your audience
- Objection handling techniques
- CTA optimization patterns

All of it. Loaded. Applied. Without you thinking about it.

What Builders Are Shipping

> *“"I've spent years learning copywriting. The Growth Kit distilled everything I know into something Claude can actually use. My landing page conversions doubled after rewriting with these frameworks."”*

> *“"I was spending 4 hours on every blog post and still producing mediocre content. Now I have a system that produces SEO-optimized, genuinely useful articles in under an hour. The keyword research skill alone paid for this 10x."”*

> *“"Finally launched my product after 6 months of 'almost ready.' The GTM playbook gave me the exact steps. The email sequence skill wrote my launch emails. I stopped overthinking and started shipping."”*

Who This Is For

The Growth Kit is built for you if:

- You're a **technical founder** who can build anything but struggles to explain why anyone should care
- You're a **solo developer** launching a product and need marketing that doesn't require hiring an agency
- You're **overwhelmed by marketing advice** and want one consolidated system instead of 47 different gurus
- You've **tried content marketing** but couldn't maintain consistency or see results
- You want to **understand marketing**, not just outsource it - because you know you'll need to do this again
- **Marketing agencies** - Claude + This Growth Marketing Kit can output the work of entire teams in hours.

Who This Is NOT For

- **Anyone expecting viral growth hacks** - These are proven fundamentals, not get-rich-quick tricks

Why This Works: Marketing On-Demand

The problem with learning marketing: You read about PAS framework. You understand AIDA. You know you should have a positioning statement. But when you sit down to write, your mind goes blank. The frameworks don't surface when you need them.

Our solution: The frameworks live in Claude, not your memory.

- **Ask for a landing page.** Claude automatically loads copywriting frameworks, awareness level matching, headline formulas, CTA optimization - all before writing a word.
- **Ask for competitor research.** Claude runs a systematic analysis: positioning gaps, feature matrices, battle cards, "how to win" playbook.
- **Ask for a content strategy.** Claude executes keyword research, clusters topics, prioritizes by opportunity, and plans a content calendar.

Result: Marketing expertise on-demand, applied automatically, without you having to remember anything.

The Five Skill Areas

1. Idea to Product - Validation before building

20-question idea extraction, viability scoring, competitive intelligence, implementation planning. Know if your idea has legs before you write code.

2. Market Research - Understanding before executing

Competitor analysis with battle cards. Target segment profiling. Positioning strategy development. Keyword research and clustering.

3. Marketing Execution - Content that converts

Direct response copy (landing pages, ads). SEO content (planning + writing). Email sequences (welcome, nurture, launch). Lead magnet creation. Newsletter templates.

4. Distribution - Getting seen

Content repurposing (1 piece into 10 across platforms). Reddit marketing strategy. Twitter/X viral formulas. Go-to-market playbooks. Launch checklists.

5. Media Creation - Visual strategy

AI image generation guidance. Social graphics optimization. Anti-generic visual techniques. Content system building (not one-off assets).

The Difference Growth Kit Makes

❌ Without Growth Kit

You: "Write me a landing page for my SaaS"

Claude: "Here's a landing page..."

[Generic headline, no pain agitation, weak CTA]

You: "This doesn't feel compelling..."

[Still generic, different words same energy]

[2 hours later - gives up, ships mediocre page]

Result: 0.5% conversion rate. Crickets.

✔ With Growth Kit

You: "Write me a landing page for my SaaS"

[Growth Kit skill loads automatically]

[Copywriting frameworks activate]

[PAS structure applied]

Claude delivers:

- Pain-agitating opening that resonates
- Clear problem-solution bridge
- Benefit-focused feature sections
- Objection-handling FAQ
- Optimized CTAs throughout

Result: Landing page that actually converts.

Same Claude. Same prompt. Completely different output.

What's Inside the Growth Kit

.claude/skills/growth-kit/

```

34 skill files. 15,000+ lines of frameworks and templates. Every file is actionable. No theory-only content.

Real Marketing. Real Results.

"I Need a Landing Page"

What Growth Kit does:

- Loads direct-response-copy skill
- Applies PAS framework (problem, agitation, solution)
- Uses headline formulas from copywriting-frameworks reference
- Structures sections for conversion flow
- Includes FAQ for objection handling
- Optimizes CTAs with proven patterns

Output: Complete landing page copy, structured for conversion, not just "a landing page"

"I Need Content Ideas"

What Growth Kit does:

- Runs keyword-research skill
- Identifies priority topic clusters
- Analyzes search intent
- Prioritizes by opportunity (volume vs. difficulty)
- Plans content calendar

Output: Prioritized content roadmap with specific keywords, not random blog post ideas

"I'm Launching Next Week"

What Growth Kit does:

- Loads GTM playbook + launch checklists
- Generates launch email sequence (6-10 emails)
- Creates announcement copy for each platform
- Provides day-by-day execution plan
- Includes post-launch follow-up sequence

Output: Complete launch kit - emails, social posts, timeline, checklist

---

Why Not Just Use ChatGPT for Marketing?

You can. And you'll get generic output every time.

The difference: The Growth Kit is a consolidation of marketing best practices from the people who actually do this for a living. Not AI-generated summaries. Distilled knowledge from:

- Classic direct response copywriters (Hormozi, Schwartz)
- Modern growth practitioners (top marketing blogs, proven frameworks)
- Platform-specific tactics (Reddit, Twitter, SEO - what actually works in 2026)
- Real campaign learnings (what converted, what flopped, why)

All of it synthesized into skill files that Claude can actually apply. Not just "write like a marketer" - specific frameworks, specific templates, specific patterns.

This is a living system. When new tactics work, they get added. When platforms change, references update. You're not buying a static download - you're getting a framework that evolves.

The Real Cost of Figuring It Out Yourself

DIY Marketing Education:

- 6+ months - Learning copywriting fundamentals
- 3+ months - Understanding SEO and content strategy
- Countless hours - Reading marketing blogs and books
- $500-2,000 - Courses that teach theory, not implementation
- $3,000-10,000 - Hiring an agency for a single campaign
- ??? - Still freezing when it's time to write

Total: Months of learning before you can execute

And your product stays invisible while you learn.

With Growth Kit:

- **Day 1** - Start using marketing frameworks immediately
- **Day 1** - Write landing pages with proven structures
- **Day 1** - Research competitors systematically
- **Day 1** - Create content with SEO strategy

Total: Marketing execution from day one. Learn by doing.

Common Questions

Q: Do I need marketing experience?

No. The Growth Kit contains the frameworks so you don't have to know them. Claude applies PAS, AIDA, awareness level matching - all automatically. You learn marketing by seeing it applied, not by memorizing before you start.

Q: Will this work for my specific niche?

Yes. The frameworks are universal - they work whether you're selling developer tools, a SaaS product, consulting services, or physical products. The principles of persuasion don't change by industry. The specific language adapts to your context.

Q: Isn't this just fancy prompts?

No. This is 15,000+ lines of distilled marketing knowledge: specific frameworks, specific templates, specific patterns. Copywriting formulas from decades of direct response. SEO tactics that work in 2024. Platform-specific strategies for Reddit, Twitter, email. Claude doesn't have this in its training data with this specificity and organization.

Q: How is this different from the Code Kit?

The Code Kit is for building. The Growth Kit is for marketing what you build. Code Kit gives you 15 specialized development agents, context management, and coding workflows. Growth Kit gives you market research, copywriting, content strategy, and launch execution. Most builders need both - build great products AND communicate their value.

Q: I already know some marketing. Is this still useful?

If you can write a landing page in 30 minutes that converts at 3%+, you probably don't need this. If you still struggle with blank page syndrome, spend hours on copy, or don't have systematic approaches to research and content, the Growth Kit will accelerate you.

Q: What if AI-generated content hurts my SEO?

The Growth Kit includes human-content-patterns reference specifically for this. E-E-A-T compliant writing patterns, authenticity markers, 20+ techniques for making AI-assisted content indistinguishable from human-written. Google penalizes low-quality content, not AI content. Quality is the variable.

Your Marketing Department Is Ready

34 skill files. 15,000+ lines of frameworks. Research, copywriting, content, email, distribution, launch - all built into Claude.

Stop staring at blank pages. Stop guessing what works. Stop watching competitors win with worse products.

Start marketing with confidence.

Get the Growth Kit and finally communicate your value.
