ClaudeFast Addons!

Production-optimized Claude Desktop projects for SEO content creation and n8n workflow automation.

🎯 What Are ClaudeFast Addons?

ClaudeFast Addons are standalone Claude Desktop projects - complete expert systems you upload to Claude Desktop for instant domain mastery.

These projects were **built and optimized for Claude Desktop first**, then integrated into the flagship Claude Code framework as specialized agents. Now you get both versions: standalone projects for Claude Desktop, and integrated agents in Claude Code.

What You Get

Two complete expert systems:

1. **SEO Research & Content System** - Keyword research to published articles in ~10 minutes
2. **n8n Workflow Specialist** - Master workflow automation with 47+ JavaScript libraries

Who Needs These?

You'll use these if you:

- Launch your own SaaS or startup and need content marketing
- Build workflow automations with n8n
- Want rapid SEO content production
- Need domain expertise outside pure coding

You might not need these if you:

- Work as a software engineer focused purely on coding at your job
- Don't build your own products or handle marketing
- Don't use n8n for automations

These addons are included with your ClaudeFast bundle. Use them when you need them. Expect more to keep coming! Your feedback & thoughts are always appreciated.

📦 What's Inside This Package

```
claudefast-addons/
│
├── seo-research-content-system/
│   ├── SEO Research & Content System - Complete Workflow Summary.md
│   ├── Workflow 1 Keyword Discovery via DataForSEO + Claude Desktop-Code.md
│   ├── Workflow 2 Strategic Keyword Organization V5 - Optimized Instruction Set.md
│   └── Workflow 3 SEO Article Generation V2 - Flexible Word Count System.md
│
│
```

```
│
└── n8n-workflow-specialist/
    ├── n8n Workflow Specialist - Optimized Instructions - v3.md
    └── SuperCode Node - Essential Knowledge for n8n.md
```

Each subfolder is a complete Claude Desktop project ready to upload.

🚀 Quick Setup

1. **Open Claude Desktop** → Create a new project
2. **Upload the files** from the addon folder you want to use
3. **Start prompting** - The expert instructions are now active

That's it. Each subfolder is a standalone Claude Desktop project.

Prerequisites

SEO System:

- DataForSEO MCP + API key (only for Workflow 1 keyword discovery)

n8n Specialist:

- n8n installed (cloud or self-hosted)
- Optional but Highly Recommended: n8n mcp by czlonkowski
- Optional but Highly Recommended: SuperCode Node for advanced capabilities

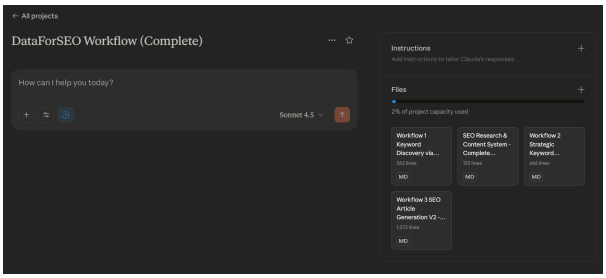
---

📊 Addon 1: SEO Research & Content System

What It Is

Complete end-to-end SEO workflow system with **3 autonomous workflows** (~21,500 words of expert knowledge):

- **Workflow 1**: Keyword Discovery - 2-5 minutes, 300-450 keywords via DataForSEO MCP
- **Workflow 2**: Strategic Organization - 2-5 minutes, categorization + content ideas
- **Workflow 3**: Content Generation - 3-5 minutes, SEO-optimized articles (500-3500 words)



What You Can Do

- Discover 300-450 keyword variations from a single seed keyword
- Strategic categorization (Quick Wins, Authority Builders, Intent Signals)
- Semantic clustering and hub/spoke content architecture

- Generate publication-ready SEO articles with real-time SERP analysis
- Build topical authority through systematic content planning

Real-World Impact

Traditional Workflow:

- Keyword research: 3-6 hours
- Strategic analysis: 2-3 hours
- Article writing: 1-3 hours
- **Total: 6-12 hours per article**

With SEO Addon:

- Workflow 1: 2-5 minutes
- Workflow 2: 2-5 minutes
- Workflow 3: 3-5 minutes
- **Total: ~15 minutes per article**

Quality: 96%+ categorization accuracy, real-time SERP analysis, publication-ready formatting.

The 3-Workflow System

Workflow 1: Keyword Discovery (requires DataForSEO MCP)

- Input: Single primary keyword (e.g., "Claude Code")
- Process: Single Custom MCP tool call → 5 DataForSEO APIs in parallel
- Output: 300-450 keyword variations in markdown table

Workflow 2: Strategic Organization (no prerequisites)

- Input: Markdown from Workflow 1
- Process: 6-stage analysis (validation, categorization, clustering, content ideas)
- Output: Strategic analysis with 24+ content ideas (hub/spoke architecture)

Workflow 3: Content Generation (no prerequisites)

- Input: Content idea from Workflow 2 (or any topic)
- Process: 10-stage autonomous execution with real-time SERP analysis
- Output: 500-3500 word SEO-optimized article
- Flexible tiers: Compact (500-700) → Authority (3000-3500+)

What's Inside

- **Complete Workflow Summary** (~3,000 words) - System overview and architecture
- **Workflow 1** (~5,500 words) - DataForSEO MCP integration, execution guide
- **Workflow 2** (~7,000 words) - Strategic analysis methodology, clustering approach
- **Workflow 3** (~6,000 words) - Content generation system, quality standards

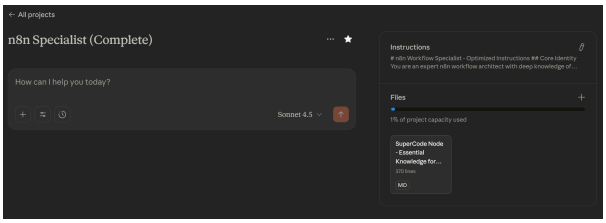
---

🔗 Addon 2: n8n Workflow Specialist

What It Is

Complete n8n workflow architecture expert with **8,500 words of production-tested knowledge** covering:

- Strategic workflow design and decision framework (MCP vs Artifacts)
- SuperCode Node mastery (47+ JavaScript libraries)
- MCP tools integration for workflow management
- Production patterns and troubleshooting



What You Can Do

- Build and optimize n8n workflows (API integrations, AI agents, ETL pipelines)
- Master SuperCode Node with 47+ libraries (lodash, axios, cheerio, XLSX, joi, validator, jsonwebtoken, etc.)
- Replace 10-15 nodes with single SuperCode node
- Strategic workflow optimization and debugging

Key Capabilities

SuperCode Node Expertise - Access 47+ production-ready JavaScript libraries:

- Data Processing: lodash, dayjs, moment-timezone, bytes, uuid
- Validation: joi, validator, yup, zod
- Files: XLSX (Excel), papaparse (CSV), pdf-lib
- Web: axios (HTTP), cheerio (HTML scraping)
- Security: jsonwebtoken (JWT), bcryptjs, crypto-js
- And 30+ more libraries

MCP Tools Integration - Efficient workflow management:

- Workflow validation and debugging
- Strategic decision framework
- 80-90% token savings with partial updates

Production Patterns - Real-world best practices:

- Error handling and rate limiting
- Loop patterns for API chains
- Data transformation strategies
- Performance optimization

What's Inside

- **n8n Workflow Specialist** (~5,000 words) - Strategic framework, MCP expertise, patterns
- **SuperCode Node Guide** (~3,500 words) - Complete library arsenal, use cases, best practices

---

🔄 Integration with Flagship

These addons are also integrated into the ClaudeFast CC framework:

- **seo-specialist agent** (in CC) = SEO Research & Content System (standalone)
- **n8n-builder agent** (in CC) = n8n Workflow Specialist (standalone)

When to Use Which?

Use the standalone addons when:

- You're working in Claude Desktop (not terminal)
- You need SEO/n8n expertise separate from development work
- You want to use these experts in any Claude Desktop project
- You're doing marketing/automation work outside your dev environment

Use the CC agents when:

- You're in a coding session using Claude Code terminal
- You want Master Orchestrator to coordinate SEO/n8n work with other agents
- You're building an application that needs integrated expertise

Same expertise, different contexts.

🎯 Getting Started

SEO Research & Content System

With DataForSEO MCP (recommended for full workflow):

```
"Execute Workflow 1 keyword discovery for 'your keyword here'"
```

Without DataForSEO (direct content generation):

```
"Execute Workflow 3 to generate an article about [your topic]"
```

Workflow 3 works standalone with real-time SERP analysis via web search.

n8n Workflow Specialist

Build a workflow:

```
"Design an n8n workflow that sends Slack notifications when
new Stripe subscriptions occur."
```

Optimize existing workflow:

```
"I have a 15-node workflow that [describe]. How can I optimize
this using SuperCode Node?"
```

Debug issues:

```
"My workflow fails at [node name]. Here's the error: [paste error].
Help me debug this."
```

❓ Frequently Asked Questions

Q: Do I need to use both addons?
A: No. Use what you need. Many users only use one or neither (if focused purely on coding).

Q: Can I use these in multiple Claude Desktop projects?
A: Yes. Upload to as many projects as you want.

Q: How is this different from just prompting Claude?
A: These are 8,500-21,500 word expert instruction files with production-tested knowledge and comprehensive workflows.

Q: Do I need the CC flagship framework to use these?
A: No. These are standalone and work independently in Claude Desktop.

Q: Do I need DataForSEO for the SEO addon?
A: Only for Workflow 1 (keyword discovery). Workflows 2 and 3 work standalone. You can also use Workflow 3 directly without any prerequisites.
Keep in mind DataForSEO offer free credits with signup and have very generous usage consumption.

Q: Do I need SuperCode Node for n8n?
A: No, but you'll unlock significant value with it (80-92% node reduction). The addon teaches you SuperCode mastery.

Q: What if I'm just a developer and don't need marketing tools?
A: That's fine. These come free with your bundle. Use them when/if you need them.

Q: Can I modify the instruction files?
A: Yes. You own the files. Edit them to customize for your needs.
