Step 1 – Choose Your Framework

Here are 30 frameworks to choose from and each will give you an awesome piece of content that's unique.

FRAME (Focused, Relevant, Actionable, Memorable, Engaging)

- Focused: Concentrate on a single key point or topic.
- Relevant: Ensure it directly connects to your audience's needs or pain points.
- Actionable: Provide clear, specific actions the reader can take.
- Memorable: Use storytelling, metaphors, or anecdotes to make the content stick.
- Engaging: Use engaging hooks and questions to encourage interaction.

TRUTH (Timeless, Reliable, Unique, Trustworthy, Hidden)

- Timeless: Share insights that hold value beyond trends or fads.
- Reliable: Back up claims with research or case studies.
- Unique: Offer something your audience hasn't heard before.
- Trustworthy: Build credibility by providing honest, accurate content.
- Hidden: Reveal hidden knowledge or facts that surprise the reader.

SHAPE (Story, Hook, Authority, Perspective, Execution)

- Story: Start with a compelling story to draw readers in.
- Hook: Use a psychological hook based on curiosity or emotion.
- Authority: Establish authority through expert-level insights.
- Perspective: Offer a new or unconventional viewpoint.
- Execution: Deliver content that's executed flawlessly in both structure and tone.

LURE (Linger, Unravel, Reveal, Empower)

- Linger: Keep readers lingering with suspenseful, open-ended questions.
- Unravel: Gradually unravel complex ideas in a clear, engaging way.
- Reveal: Drop under-the-radar insights or myth-busting facts.
- Empower: End with content that empowers the reader to take action.

THRIVE (Tactical, High-Impact, Relevant, Innovative, Valuable, Engaging)

- Tactical: Offer practical, actionable strategies that go beyond theory.
- High-Impact: Deliver content that addresses critical pain points with transformative solutions.
- Relevant: Ensure the content is hyper-relevant to current trends or audience needs.
- Innovative: Present novel approaches and solutions.
- Valuable: Provide exclusive value with deep-dive insights.
- Engaging: Keep the content lively and interactive.

DRIVE (Deep, Rare, Insightful, Valuable, Essential)

- Deep: Dive deep into the subject matter to showcase profound insights.
- Rare: Share little-known strategies or uncommon solutions.
- Insightful: Provide thought-provoking insights that challenge conventional wisdom.
- Valuable: Give practical value that readers can apply immediately.
- Essential: Make your content essential reading with exclusive, high-level information.

CHAIN (Curiosity, Hook, Analysis, Insider, Narrative)

- Curiosity: Use curiosity-driven hooks that spark interest.
- Hook: Engage with psychological or NLP-based hooks to grab attention.
- Analysis: Provide deep-dive analysis and expert-level breakdowns.
- Insider: Offer insider knowledge or behind-the-scenes insights.
- Narrative: Weave everything together in a compelling, narrative-driven format.

GOLD (Grasp, Optimize, Leverage, Deliver)

- Grasp: Help the reader grasp complex concepts by simplifying them.
- Optimize: Optimize for engagement with ninja techniques and revolutionary strategies.
- Leverage: Leverage exclusive, rarely discussed techniques that readers can't find elsewhere.
- Deliver: Deliver unique insights that pack a powerful punch with actionable solutions.

STORY (Set-Up, Twist, Outcome, Reveal, Yield)

- Set-Up: Establish a scenario or problem that resonates with the reader.
- Twist: Introduce a surprising or unconventional twist.
- Outcome: Present a transformative solution or expert-level insight.
- Reveal: Reveal behind-the-curtain secrets or under-the-radar techniques.
- Yield: Conclude by showing how this insight yields powerful results.

EDGE (Engage, Disrupt, Guide, Elevate)

- Engage: Start by engaging the audience with an attention-grabbing hook.
- Disrupt: Disrupt conventional wisdom or expectations with cutting-edge insights.
- Guide: Guide the reader step-by-step with expert-level knowledge.
- Elevate: Elevate the reader's understanding with advanced, game-changing strategies.

BOOST (Breakdown, Original, Optimize, Simplify, Transform)

- Breakdown: Break down complex topics into manageable pieces.
- Original: Provide fresh, original insights or perspectives.
- Optimize: Optimize content with insider tricks for readability and SEO.
- Simplify: Simplify advanced concepts for clarity and understanding.
- Transform: Leave the reader with transformational takeaways or solutions.

GROW (Gather, Refine, Organize, Win)

- Gather: Gather cutting-edge information from reliable, exclusive sources.
- Refine: Refine the content with deep-dive analysis and ninja insights.
- Organize: Organize the content in a reader-friendly, digestible way.
- Win: Ensure the reader wins by delivering actionable, high-value content.

FOCUS (Frame, Organize, Challenge, Uncover, Simplify)

- Frame: Frame your content with expert-level introductions and setups.
- Organize: Organize insights into logical, easy-to-follow sections.
- Challenge: Challenge conventional wisdom with myth-busting facts.
- Uncover: Uncover hidden insights or expert-level secrets.
- Simplify: Simplify the takeaways for immediate application by readers.

CLEAR (Concise, Layered, Engaging, Accurate, Relatable)

- Concise: Keep the message concise while packing it with value.
- Layered: Provide layered insights, starting basic and diving deep.
- Engaging: Keep the reader engaged with psychological hooks and storytelling.
- Accurate: Ensure accuracy with insider information and well-researched data.
- Relatable: Make the content relatable by addressing real-world challenges.

SPARK (Stimulate, Present, Activate, Refine, Kindle)

- Stimulate: Stimulate curiosity or emotional engagement with a strong hook.
- Present: Present expert-level knowledge in a clear, organized fashion.
- Activate: Activate the reader's desire to take action with practical insights.
- Refine: Refine the content with beyond-the-basics details and ninja tricks.
- Kindle: Kindle further engagement by offering thought-provoking questions or challenges.

PULSE (Pinpoint, Uncover, Leverage, Solve, Elevate)

- Pinpoint: Pinpoint key problems or areas of interest to your audience.
- Uncover: Uncover deep, rarely discussed truths or hidden knowledge.
- Leverage: Leverage exclusive information or insider strategies.
- Solve: Offer clear, actionable solutions or tactics.
- Elevate: Elevate the reader’s understanding and provide a sense of mastery.

CRISP (Capture, Reveal, Inform, Simplify, Persuade)

- Capture: Capture attention with cutting-edge hooks or shocking facts.
- Reveal: Reveal hidden or under-the-radar strategies.
- Inform: Provide deeply researched, expert-level information.
- Simplify: Simplify complex ideas with practical steps or analogies.
- Persuade: Persuade readers by weaving in emotionally charged language and examples.

RAISE (Research, Analyze, Innovate, Simplify, Execute)

- Research: Begin with deep research using rare, little-known sources.
- Analyze: Analyze the data to extract novel insights or debunk myths.
- Innovate: Introduce innovative approaches or game-changing strategies.
- Simplify: Simplify the takeaways for immediate application by readers.
- Execute: Deliver a step-by-step execution plan or action guide.

ALERT (Attract, Lead, Engage, Reveal, Transform)

- Attract: Attract attention with an intriguing hook or opening statement.
- Lead: Lead the reader through logical, expertly crafted content.
- Engage: Engage them with personal anecdotes, examples, or case studies.
- Reveal: Reveal little-known facts or top-secret techniques.
- Transform: Leave readers with transformative insights or next-level strategies.

POWER (Present, Optimize, Work, Engage, Reinforce)

- Present: Present high-level concepts with a deep-dive approach.
- Optimize: Optimize content with rare strategies or advanced tactics.
- Work: Showcase case studies or real-world examples of success.
- Engage: Engage the reader with under-the-radar insights and calls to action.
- Reinforce: Reinforce key points by summarizing with actionable tips.

STEALTH (Story, Trigger, Explain, Analyze, Leverage, Teach, Hook)

- Story: Start with a relatable or thought-provoking story.
- Trigger: Use psychological or emotional triggers to connect with the reader.
- Explain: Break down complex concepts with expert-level explanations.
- Analyze: Provide in-depth analysis using data or insider insights.
- Leverage: Leverage ninja tactics or revolutionary techniques for engagement.
- Teach: Teach readers how to apply the information.
- Hook: End with a memorable hook to encourage further action or reflection.

CLARITY (Clarify, Lead, Apply, Reveal, Inspire, Transform, Yield)

- Clarify: Clarify the purpose and main takeaway of the post early on.
- Lead: Lead with an impactful hook or question to grab attention.
- Apply: Show how to apply the content in real-life scenarios.
- Reveal: Reveal hidden insights or under-the-radar strategies.
- Inspire: Inspire the reader with motivating examples or success stories.
- Transform: Provide transformative steps or revolutionary tactics.
- Yield: Conclude with actionable advice that yields real results.

IMPACT (Introduce, Motivate, Present, Analyze, Conclude, Teach)

- Introduce: Introduce the topic with an attention-grabbing fact or statistic.
- Motivate: Motivate the reader by addressing their pain points.
- Present: Present advanced insights or novel approaches to solving the problem.
- Analyze: Analyze the problem in-depth with myth-busting facts or expert knowledge.
- Conclude: Summarize the key points with actionable steps.
- Teach: Teach the reader how to replicate success or apply the solutions.

SHARP (Simplify, Hook, Amplify, Refine, Present)

- Simplify: Simplify complex ideas for clarity and ease of understanding.
- Hook: Use a psychological or emotional hook to captivate readers early on.
- Amplify: Amplify the significance with expert-only knowledge or cutting-edge insights.
- Refine: Refine your arguments using ninja tactics and insider tricks.
- Present: Present a clear call to action or conclusion that encourages the next steps.

DEEP (Discover, Engage, Explore, Provide)

- Discover: Help the reader discover new ideas or hidden knowledge.
- Engage: Engage the reader by addressing a common problem or curiosity.
- Explore: Explore beyond the basics with in-depth analysis or under-the-radar insights.
- Provide: Provide actionable advice or insider solutions that solve real problems.

ALIVE (Attract, Lead, Inform, Validate, Empower)

- Attract: Attract attention with a bold statement or expert-level hook.
- Lead: Lead readers through the content with a clear, logical structure.
- Inform: Inform with deep-dive research or top-secret strategies.
- Validate: Validate points using case studies or expert examples.
- Empower: Empower readers with actionable steps or transformative insights.

POWER (Pinpoint, Organize, Win, Engage, Repeat)

- Pinpoint: Pinpoint key insights that resonate deeply with your audience.
- Organize: Organize the content so that it flows naturally and is easy to digest.
- Win: Provide strategies or solutions that help the reader "win" at their challenges.
- Engage: Use engaging storytelling and under-the-radar techniques to hold attention.
- Repeat: Reinforce the key takeaways to ensure readers leave with lasting value.

PRIME (Present, Reveal, Inspire, Motivate, Engage)

- Present: Present the topic with a strong opening hook or surprising fact.
- Reveal: Reveal little-known strategies or expert-only knowledge.
- Inspire: Inspire action by showing examples of success or transformation.
- Motivate: Motivate readers to take the next step with psychological tactics.
- Engage: Engage with calls to action or deeper questions that stimulate curiosity.

VALUE (Visualize, Amplify, Lead, Unveil, Execute)

- Visualize: Help the reader visualize the end goal or benefit of the content.
- Amplify: Amplify your message with powerful, expert-level examples.
- Lead: Lead readers through a structured, engaging flow of information.
- Unveil: Unveil hidden knowledge, insider tips, or secret methods.
- Execute: Show how to execute the strategies with actionable steps or examples.

RACE (Research, Analyze, Create, Elevate)

- Research: Start with deep research, using expert sources and little-known data.
- Analyze: Analyze the problem or opportunity using expert-level insights.
- Create: Create content that offers revolutionary approaches or ninja tactics.
- Elevate: Elevate the reader's understanding or results with exclusive solutions.

Step 1 – Choose Your Framework

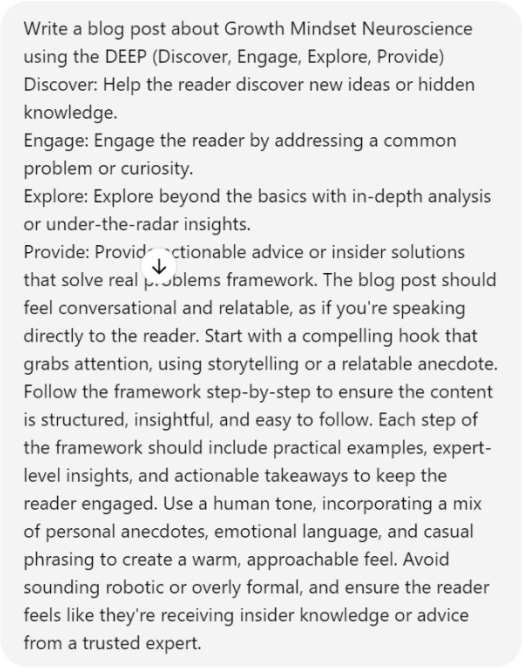
Now that you have a framework you would like to use, pick a keyword or topic you would like the piece of content to focus around.

If you're going for free SEO traffic ideally the keyword should be 3-4 words in length.

In this example we'll use "Growth Mindset Neuroscience" and the DEEP framework.

In the prompt below replace [keyword] with this keyword and [framework] with the framework you chose. Copy and paste the whole framework and don't just use the letters:

Write a blog post about **[keyword]** using the **[framework]** framework. The blog post should feel conversational and relatable, as if you're speaking directly to the reader. Start with a compelling hook that grabs attention, using storytelling or a relatable anecdote. Follow the framework step-by-step to ensure the content is structured, insightful, and easy to follow. Each step of the framework should include practical examples, expert-level insights, and actionable takeaways to keep the reader engaged. Use a human tone, incorporating a mix of personal anecdotes, emotional language, and casual phrasing to create a warm, approachable feel. Avoid sounding robotic or overly formal, and ensure the reader feels like they're receiving insider knowledge or advice from a trusted expert.



Unlocking Growth Mindset Through Neuroscience: How Your Brain Can Help You Thrive

I remember the first time I really struggled with self-doubt. It was a project I had poured my heart into, but no matter how hard I worked, it felt like I'd hit a wall. "Maybe I'm just not good at this," I thought. But then something clicked: it wasn't about what I could or couldn't do—it's about *how* I thought about my abilities. That's when I first stumbled upon the concept of a **growth mindset**, and, trust me, it's been a game-changer ever since. And here's the fascinating part: neuroscience backs this up in ways that might surprise you. Let's dive in and **discover** what's really happening in your brain when you adopt a growth mindset.

Discover: Unlocking the Hidden Power of Neuroplasticity

We often hear about the power of positive thinking, but have you ever thought about the actual science behind it? The brain's ability to change—called **neuroplasticity**—is the foundation of the growth mindset. Neuroplasticity means that the brain isn't set in stone; it can form new connections and strengthen old ones, literally changing how we think and learn over time.

Here's the secret: When you believe you can improve, your brain starts to rewire itself accordingly. Think of it like a muscle that grows stronger with exercise. Every time you tackle a challenge or embrace a new skill, your brain adapts, proving that you're not limited by your starting point. **This shift** can make all the difference, transforming how we see our potential. But don't just take my word for it—the science is there, waiting to be explored.

Engage: Why Fixed Mindsets Hold Us Back (And What to Do About It)

Have you ever felt like you just aren't "built out" for something—whether it's learning a new language, excelling at math, or being creative? That's the classic voice of a **fixed mindset**, which tells us our abilities are set and there's no point in trying. It's a frustrating place to be, isn't it? But here's where the growth mindset comes in, turning that inner dialogue on its head.

The problem with a fixed mindset is that it discourages effort. Why try if failure is inevitable, right? But **neuroscience shows** that effort is exactly what helps your brain grow. The more you work through challenges, the stronger your neural pathways become. So, that struggle you're feeling? It's actually a sign your brain is working to improve, not that you're failing. That's a powerful shift, one that can motivate you to push through instead of giving up.

Explore: Going Deeper Into the Science—How Your Brain Adapts and Grows

Let's go a little deeper. When you face a challenge, your brain releases chemicals like **dopamine** and **noradrenaline**—they're your brain's way of rewarding effort and keeping you motivated. This process is known as **reward-based learning**, and it's one of the hidden mechanisms behind a growth mindset. The more you engage with a difficult task, the more your brain learns to associate effort with progress, lighting up those reward circuits.

Here's another fun fact: Every time you take on a new challenge, your brain's **prefrontal cortex** (the part responsible for decision-making and problem-solving) gets a workout. It helps regulate your behavior and keeps you focused on long-term goals. And get this: The more you practice tackling tough situations, the more resilient and adaptable your brain becomes. Think of it like **cognitive weightlifting**—each repetition strengthens your mental muscle.

Provide: Actionable Strategies to Cultivate a Growth Mindset

Now that we've explored how your brain is wired for growth, let's talk about how you can apply this knowledge to your everyday life. Here are some practical, neuroscience-backed strategies to help you develop and sustain a growth mindset:

1. **Embrace Challenges, Don't Avoid Them**: The next time you face something difficult, remind yourself that this is where growth happens. Instead of seeing it as a barrier, view it as a stepping stone that's literally helping your brain strengthen its neural connections.
2. **Shift Your Self-Talk**: Words matter. When you hear that inner voice say, "I can't do this," change the narrative to "I can't do this *yet*." That tiny shift signals to your brain that improvement is possible.
3. **Celebrate Effort Over Results**: Instead of focusing solely on the outcome, celebrate the process. Every bit of effort is reinforcing those new neural pathways, whether you succeed on the first try or not.
4. **Adopt a Learning Attitude**: Approach each task with curiosity rather than fear of failure. Every experience—good or bad—is an opportunity for your brain to learn and adapt. When you think of each failure as data, rather than defeat, you allow your brain to grow without the fear of judgment.
5. **Practice Daily Reflection**: Take a few minutes each day to reflect on what you've learned or how you've grown. This not only reinforces the growth mindset but also gives your brain a chance to consolidate new neural pathways.

In the end, cultivating a growth mindset is more than just believing in self-improvement—it's about knowing how your brain works and using that knowledge to fuel your personal growth. The next time you're faced with a tough challenge, remember: Your brain is ready and capable of change. You just need to give it the opportunity to flex its neuroplastic muscles. And the more you embrace this mindset, the more you'll see those changes unfold—not just in your thoughts, but in the actual structure of your brain.

So, what's stopping you from rewiring your potential?

This blog post follows the **DEEP** framework while maintaining a human, relatable tone. It gives the reader actionable steps, grounded in neuroscience, for developing a growth mindset.
